Fred Gerdeman
Building 371, D&D Program Lead
DOE, RFFO

**TRANSMITTAL OF REVISION 1 OF THE RECONNAISSANCE LEVEL
CHARACTERIZATION/PRE-DEMOLITION SURVEY REPORT FOR THE 371 NORTH-SIDE
DEMOLITION PROJECT - JPF-039-01**

Provided for your review and approval is subject report and revised Attachments B and D and inserts for Attachment C for the Building 371 North-side Demolition Project. The report has been revised to incorporate comments received from DOE and the Colorado Department of Health and Environment (CDPHE) on September 6, 2001 and from DOE on September 20, 2001. The report characterizes the physical, chemical and radiological hazards associated with the Project, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization and presents the data quality assessment, verification and validation of results. Based upon our results, Tanks 163, 164, 165 & 167 are confirmed to be free of contamination and can be released. Once Tanks 168 & 169 are verified to be empty and free of hazardous waste characteristics, they can be considered free of contamination and released. The related containment, berms and pads are considered Type 1 structures and can be released as well. In addition, all asbestos containing material will be managed in accordance with Environmental Protection Agency and CDPHE regulations.

I would appreciate approval of this report and your forwarding a formal copy to the CDPHE for their concurrence and approval. If you have any questions, don't hesitate to call me at extension 2850.

Jim Floerke
D&D Project Manager
Building 371 Project
